Transmittal No. 06-44

Spain – Turbine Engines

Washington, July 27, 2006 - The Defense Security Cooperation Agency notified Congress of a possible Foreign Military Sale to Spain of T55-GA-714A Turbine Engines as well as associated equipment and services. The total value, if all options are exercised, could be as high as \$73 million.

The Government of Spain has requested a possible sale of 43 T55-GA-714A Turbine Engines, modification and fielding kits, test equipment, technical assistance, spare and repair parts, and other related elements of logistics support. The estimated cost is \$73 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by helping to improve the military capabilities of Spain and furthering standardization and interoperability with U.S. forces.

Spain needs these engines to replace those used in CH-47 Chinook aircraft supporting coalition operations. The proposed sale will enhance Spain's ability to continue to engage in coalition warfare along with the U.S. Army. Spain will have no difficulty absorbing these additional engines into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Honeywell International of Phoenix Arizona. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any U.S. Government or contractor representatives to Spain.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law; it does not mean that the sale has been concluded.
